UNFINISHED BUSINESS

Curb Box and Service Agreement Procedure – Tabled.

Well #6 – Greg Unger updated the Board on an issue SDE is running into preparing for the pump tests at Well #6. The pump tests will create a high volume of water and it needs to be dealt with properly. SDE has come up with a plan on how to deal with this issue and if approved, SDE will work with the Solicitor and the General Manager on how to proceed. The pump tests could reach 2,000,000 gallons per day or around 2,800 gallons per minute and it needs to be taken off-site. If the water is kept on-site, then the test becomes skewed because recharging is occurring while the pump down test is occurring. The plan is to create a diversion channel to handle the mud created and run it down the property terrain to a damn breast that has been built. A pipe will then be taken from the damn breast and run over a storm-water easement that will be dumped into a catch basin on the property. Jeremy Breidenstein's property will be impacted with this plan and Patrick Donovan has already spoken to the resident and he is receptive to the plan.

A motion was made by Dan Novakovich to approve the Erosion Control plan and submit it to the appropriate regulatory agencies. The motion was seconded by Marie Coraluzzi and hearing no questions on the motion, it passed unanimously.

Mr. Unger cannot comment on exactly how or when the Authority will be impacted and if the Authority will be capable of meeting the requirements. The Board is asking Mr. Unger to write a letter stating the Authority is not in favor of DEP's proposal.

A motion was made by Dan Novakovich to respond to DEP as discussed. The motion was seconded by James Nothwehr and hearing no questions on the motion, it passed unanimously.
