Giorgio has a large wastewater treatment plant that discharges effluent above the Authority's wastewater treatment plant. Giorgio's plant is rated at approximately a half million gallons per day. They have experienced significant issues over the years. The discharge permit for Giorgio has a temperature gradient which only allows wastewater that is 10 degrees warmer than the temperature of the existing stream to be discharged. Giorgio is struggling to meet their requirements that will hit in January 2019 and are now looking at significant and costly improvements. Giorgio approached the Authority and asked if the Authority would be interested in treating Giorgio's pre-treated effluent.

The Board discussed the proposal at length and decided to get more information from the other parties involved and table the discussion at the moment.
